THE CLEAR Skin Miracle

The little-known NASA discovery that fades wrinkles, fine lines & red spots without expensive equipment or surgery

GALLIO RESEARCH GROUP
Thank you for downloading this Report!

Hi there, my name is Eric Boucher and I’m the president of Gallio Research Group.

I want to start by first thanking you for downloading this report. You’re going to LOVE the content. We are serious about anti-aging products, and we are probably the only company to publish a complete report about it.

The following report’s goal is to inform you about anti-aging products to ensure you make a sound decision about yourself and the image you see in the mirror every day.

You’ll see just how important it is when you get all the facts and get informed about the anti-aging market.

If you are getting this report, it probably means you are searching for a way to look healthier, younger or more rested. Or you want to get rid of wrinkles, fine lines, spots or scars that bother you every day.

Whatever the reason for you to want a more beautiful skin, TRUST ME, you’ll love this report.

Enjoy reading it and talk to you soon!

Eric Boucher

Is it possible to reduce fine lines and wrinkles in just 3 minutes per day?

Absolutely!

It’s no longer a hassle to bring new radiance and youthfulness to a tired, aging complexion. Imagine standing in front of the mirror and proudly seeing yourself look 5... 10... even 20 years younger.

Could you imagine reducing oversized pores, red blotches, acne scarring, sagging skin, and fine lines by replacing them with beautiful smooth-looking skin?

For most people, it would be a dream come true.

It’s not fair to have to deal with skin you’re embarrassed of. To walk around not feeling confident about how you look. To have to cover up your own beauty with makeup just to feel good about yourself.

If you’ve been suffering with skin you wish looked younger and more radiant, I’d like to introduce you to something that can change your life.

You’re about to discover a technology first conceived by NASA to heal astronauts, which is now the cutting-edge of skin rejuvenation.

But before we get into that, let’s first talk about...
What Causes Your Skin to Age

Here’s what Suzan Obagi, assistant professor of dermatology at the University of Pittsburgh and director of the Cosmetic Surgery and Skin Health Center had to say...

“What causes wrinkles to show up?

This is tricky to answer.

According to Suzan, if you look at a sample of wrinkled skin under a microscope, it’s next to impossible to find the difference between a smooth sample and an aged wrinkled sample.

From her research, Dr. Obagi believes aging is influenced by a combination of two factors.

1. What happens inside the body or how your body repairs itself
2. Environmental factors or what happens outside the body
First let’s talk about the “inside factors” which lead to aging.

As you age...

**Your Collagen Production Rapidly Decreases... Starting at Age 20!**

In fact, your collagen count goes down by 1% every year.

This is why you don’t start seeing wrinkles show up until you’re in your 30s and they continue to get worse each year after that.

That’s not all.

Other internal factors which cause your skin to change include...

- Low collagen levels forcing your skin to become thinner and more easily damaged...
- Dry, itchy skin as a result of poor functioning sweat and oil glands...
- Lack of elasticity and smoothness because you can’t produce enough elastin naturally...
- Loss of precious moisture and plumpness because your body is lacking the required level of GAG...

These are the biological factors that cause wrinkle to appear as you age.

There’s also the...
Sand-Paper Like Environmental Factors
Etching Away the Youthfulness of Your Face

Every day the surface of your skin is under attack by the sun and other environmental factors.

In fact, lifestyle choices such as tobacco use, exposure to smog and pollution, and over-exposure to the sun all lead to a thickening of the stratum corneum (the top layer of your skin).

Once this layer starts to become damaged it opens the door to wrinkle formation, discoloration, freckles and sun-spot formations. Plus, it can result in precancerous conditions like lesions called actinic keratoses.

Or even worse... skin cancer (including basal cell carcinoma, squamous cell carcinoma, lentigo malign melanoma).

If you’re a woman over 40, and your skin is plagued with an appearance of roughness, uneven tone, brown patches, and/or deep wrinkles, this can be pretty scary.

So What’s the Solution?

Dr. Obagi says that prevention and taking care of your skin before all these frightening changes start to take place is the absolute best option.

However, if you’ve missed the boat and already have damaged skin... you still have options.

Which is why you’re here today.

Lucky for you there’s now a non-surgical skin rejuvenation breakthrough which is spreading like wildfire and it’s...
The Same Technology Used by NASA to Heal Astronauts!

Over 40 years ago, NASA observed that astronauts who received skin injuries while in space would not heal properly until they were back here on Earth.

Meanwhile, NASA began experimenting with red lights to grow plants during long-distance space travel.

Not only did the red lights encourage plants to grow... they also discovered that the exposed astronauts started healing BEFORE they got back to earth!

Which could only mean one thing. The red light was causing something to happen to their wounds.

Here’s what else NASA found...

“Low-energy photon irradiation by light in the far-red to near-infrared spectral range with low-energy (LLLT) lasers or LED arrays has been found to modulate various biological processes in cell culture and animal models. This phenomenon of photobiomodulation has been applied clinically in the treatment of soft tissue injuries and the acceleration of wound healing. The mechanism of photobiomodulation by red to near-infrared light at the cellular level has been ascribed to the activation of mitochondrial respiratory chain components, resulting in initiation of a signaling cascade that promotes cellular proliferation and cytoprotection.”

“A growing body of evidence suggests that cytochrome oxidase is a key photo acceptor of light in the far-red to near-infrared spectral range. The cytochrome oxidase is an integral membrane protein that contains four redox active metal centers and has a strong absorbency in the far-red to near-infrared spectral range detectable in vivo by near-infrared spectroscopy.”
“Moreover, 660-680 nm of irradiation has been shown to increase electrons transfer in purified cytochrome oxidase, increase mitochondrial respiration and ATP synthesis in isolated mitochondria, and up-regulate cytochrome oxidase activity in cultured neuronal cells.”

“LED photostimulation induces a cascade of signaling events initiated by the initial absorption of light by cytochrome oxidase. These signaling events may include the activation of immediate early genes, transcription factors, cytochrome oxidase subunit gene expression, and a host of other enzymes and pathways related to increased oxidative metabolism.”

“In addition to increased oxidative metabolism, red to near-infrared light stimulation of mitochondrial electron transfer is known to increase the generation of reactive oxygen species. These mitochondrial generated reactive oxygen species may function as signaling molecules to provide communication between mitochondria and the cysts and nucleus.”

In “plain English,” this is called “PhotoBioStimulation”.

Scientists discovered that you can harness certain light waves from the sun to increase collagen and elastin, improve skin elasticity, increase blood circulation and release toxins without drying out your face.

Here’s what Dr. Barolet a leading pioneer, researcher, innovator and physician in the field of dermatology had to say...

“Light therapy is one of the oldest therapeutic modalities used to treat various health conditions. Sunlight benefits in treating skin diseases have been exploited for more than thousands of years in ancient Egypt, India, and China.”

Here’s even more proof of the effectiveness of light therapy on rejuvenating aging skin...
Scientific Studies PROVE Light Therapy Is the Most Effective Way to Become Beautiful Again

Your body loves to absorb a special form of light, red light, from the sun.

In fact, this light has been scientifically proven to rejuvenate your skin by making it more firm, increase collagen and elastin production, reduce wrinkles and fine lines, get rid of sun spots, dark spots and other skin blemishes, clear up acne scars, and so much more.

For years, dermatologists and other skin-care specialists have relied on expensive LED light machines for teaching your body to smooth out unwanted wrinkles. Just look at the following research studies...

<table>
<thead>
<tr>
<th>Study #1: 48% Increase in Blood Circulation Under the Skin</th>
<th>Study #2: 81% Reduction in Skin Lesions</th>
<th>Study #3: 82% Success Rate for Reducing Wrinkles!</th>
</tr>
</thead>
<tbody>
<tr>
<td>In one case study, researchers tested the effect of low-level laser therapy (LLLT) using a 680 nm red light, the same as Ruby Visage.</td>
<td>In another study, researchers tested a red laser with 633 nm on patients suffering from mild to severe acne. After 12 weeks, they enjoyed an 81% reduction in lesions on their face without any harmful side effects!</td>
<td>The Journal of Cosmetic Laser Therapy published a 2005 clinical study on 31 subjects who received eight weekly treatments of infrared LED light therapy. After the treatments were done, 82% of the patients reported that they had a marked reduction in facial wrinkles, especially around the eyes!</td>
</tr>
</tbody>
</table>

Amazingly, patients experienced a **48% increase in blood circulation** under their skin!
As you can see, LED light therapy is helping do amazing things to help people start regaining confidence in their appearance.

You’re no longer forced to live with unsightly rosacea or sagging jawlines…

… no more wrinkles, fine lines, crow’s feet or worn-out skin...

… and no more discoloration, bright-red patches or oversized pores.

The reason LED light is so successful in treating a wide variety of skin conditions is because different wavelengths have different chromophores which allows it to penetrate and heal the skin at the cellular level.

You see...

The Secret is Different Wavelengths Treat Different Conditions

Wavelengths come in the following colors...

<table>
<thead>
<tr>
<th>Blue</th>
<th>Green</th>
<th>Red</th>
<th>Near Infrared</th>
</tr>
</thead>
<tbody>
<tr>
<td>400-470 nm</td>
<td>470-550 nm</td>
<td>630-700 nm</td>
<td>700-1200 nm</td>
</tr>
</tbody>
</table>

The rule is, the longer the wavelength (i.e. the higher the number), the deeper the light penetrates into your skin. For example, red light is used successfully for deeper penetration because it’s at the higher end of the scale.
Here’s how the healing benefits of LED light therapy breaks down:

<table>
<thead>
<tr>
<th>Wound healing</th>
<th>a combination of 660 &amp; 850 nm</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inflammation/erythema/edema/rosacea</td>
<td>630-660 nm</td>
</tr>
<tr>
<td>Photodynamic Therapy</td>
<td>405-630 nm</td>
</tr>
<tr>
<td>Photorejuvenation</td>
<td>630-660 nm</td>
</tr>
<tr>
<td>Sunburn Prevention</td>
<td>660-970 nm</td>
</tr>
<tr>
<td>Post Inflammatory Hyperpigmentation Prevention</td>
<td>870-970 nm</td>
</tr>
<tr>
<td>Scar Prevention</td>
<td>805-970 nm</td>
</tr>
<tr>
<td>Photopreparation</td>
<td>870-970 nm</td>
</tr>
<tr>
<td>Photoregulation</td>
<td>660-850 nm</td>
</tr>
<tr>
<td>UV-free Phototherapy</td>
<td>405-850 nm</td>
</tr>
</tbody>
</table>

To treat as many layers of tissue as possible, high-end spas rely on the deep penetrating wavelengths of LED lights for maximum effectiveness.

Typically, penetration depth is less than 1 mm at 400 nm, 0.5 to 2 mm at 514 nm, 1 to 6 mm at 630 nm, and maximal at 700 to 900 nm.

At just 660 nm, LED light can reach a depth of 2.3 mm in the dermis which hits the reticular dermis. This is the thick bottom layer of your dermis where the oil and sweat glands, blood vessels, and hair follicles live.

But not all machines are created alike when it comes to penetrating power.
In fact, if you’re using a handheld device, lacking the power required to reach the reticular dermis, you might as well use a flash light on your face because you’ll be getting the same results.

Because of their low energy output, you’re forced to sit in front of your vanity for as much as 30 minutes every single day!

**Where does that leave you?**

Up until now your choices have been limited to...

| Expensive laser facial treatments... | Expensive and dangerous plastic surgery... | Time-consuming LED masks or wands... |

But we’ve discovered a better way that gets you amazing results, so you...
Don’t Look Great “For Your Age”, You Look Great for Someone 10 Years Younger!

Wouldn’t it be exhilarating to have the same smooth skin you had 10... even 20 years ago?

Imagine being able to slow down the onset of fine lines and wrinkles brought on from aging. Wouldn’t you love to gracefully glide into your 50s, 60s and even 70s without showing the normal wear and tear on your delicate facial skin?

If so, I’d like to introduce you to...

The Only All-Natural Way to Restore and Rejuvenate Your Entire Face in just 3-minute Per Day!

From today forward you’ll fall in love with the person staring back at you in the mirror.

No more oversized pores, redness, acne scars, sagging skin, wrinkles or fine lines.

How?

We’ve captured the healing power of the sun without exposing yourself to harmful UV rays.

If you point a LUX meter (a light measuring devices) straight at the sun, you’ll learn it produces an astounding brightness of 90,000 lumens.

Which means it has plenty of power to drive light waves deep into your skin. The only problem with direct sunlight is dangerous UV rays.
But we found a way to capture the healing rays and allow them to penetrate your skin, while protecting you from the harmful UV rays *(and we’ve confirmed this in laboratory studies)*.

With our background, we started looking at photonics and begin experimenting with various polymers which were being used as laser filters.

These polymers – which could be used as a “shield” – are made of super-resistant polycarbonate material.

They’re virtually indestructible.

Then it hit us.

Why not use these filters to grab healthy rays from the sun instead of trying to send a laser through them?

The Ruby Visage Beauty Mask Was Born

We became the first company to offer a device with the same power and benefits as expensive LED light therapy treatments.

Meaning our masks produced 11,000 LUX and we can prove it.

Plus, they also absorb the “harmful” UV rays that normally cause your skin to age. These are light wavelengths in the blue and green category.

More importantly – we’ve proven both these claims using expensive laboratory equipment at the University of Montreal.

This treatment is the same kind of LED light therapy you’d find at boutique health spas – in a way that’s more affordable, less time-consuming, less of a hassle, and is guaranteed to work.
In fact, you get all the benefits of expensive treatments...

<table>
<thead>
<tr>
<th>WITHOUT cords, batteries or chargers</th>
<th>Ruby Visage captures the sun’s energy to provide professional-grade results without cords, batteries or chargers...</th>
</tr>
</thead>
<tbody>
<tr>
<td>WITHOUT much time required</td>
<td>Don’t spend 30+ minutes per day as a prisoner in front of your vanity. Ruby Visage can go anywhere and takes just 3 minutes to treat your entire face!</td>
</tr>
<tr>
<td>WITHOUT discomfort</td>
<td>Ruby Visage is virtually unbreakable and as comfortable as a pair of sunglasses. Plus, it won’t cause hand, wrist or elbow pain...</td>
</tr>
<tr>
<td>WITHOUT risk</td>
<td>Ruby Visage is non-invasive, has no adverse reactions and no down-time. The technology is completely safe and there is no possibility of harm from overexposure...</td>
</tr>
</tbody>
</table>

You won’t also have to spend an arm and a leg for Ruby Visage like you would at a fancy day spa.

Did you realize that it can cost $195 for a 50-minute LED light therapy session and a staggering $125 for a 30-minute session?

It’s absolutely true!

If you look up Red Door Spa, you’ll see for yourself.
We’ve even seen fees rocket up to $290 for what the Kate Somerville clinic in West Hollywood calls the **LightStim Combo Facial**.

Your other option is one of those clunky handheld devices. A good one will cost you close to $300, but there are SO many problems people complain about.

For example...

- They take up to 30 minutes each day...
- They break and/or stop working (like any other electronic) constantly...
- They have short cords (i.e. inconvenient) or require batteries...
- If you don’t use it PERFECTLY, you don’t get the results...

In other words, they **used** to be fine, **because they were the only affordable option**.

But now that Ruby Visage is here, you don’t have to put yourself through that kind of torture anymore.

During one **3-minute, hands-free session** you can treat multiple conditions just like you would at Red Door and Kate Somerville...

But for a fraction of the price.

**Plus, we guarantee you’ll be happy with the results or you get your money back.**

Those clinics just ask you to come back for another appointment if you don’t see any changes.

Isn’t that odd?
Achieve a Younger, More Beautiful Complexion in the Comfort of Your Own Home

With Ruby Visage now you can.

You’re getting the same level of professional treatment for a fraction of the cost.

Go here to learn more about the Ruby Visage beauty mask.

You’ll be glad you made this decision, in fact...

We went to the chemistry department at the University of Montreal and asked the scientist in charge, Daniel Chartrand, to put our mask in his light machine.

We wanted to know, without a shadow of a doubt, that our mask did what we said it does.

So we slipped off into his lab, where he fired up his spectrometer and started shining different colors of light at the mask.

At the end of the day, Dr. Chartrand came back with a 5-page lab test.

This report revealed that the Ruby Visage mask performing beautifully in the same light range as the LED units used by NASA. (The machines NASA uses are called Quantum Warp light devices.)

The test proved our mask passes 50.78 mW / Cm2 worth of light intensity (the same as the Quantum Warp machine).

But that’s not all.

Our mask maintained this level of power across the entire “red light” spectrum from 590 nm – 1600 nm.

(The most beneficial area is called the “wellness spectrum”, from 650 nm-950 nm. It’s called the wellness spectrum because you get the most benefits from light in that range.)
More Effective with Less Hassle

When we took the Ruby Visage to the University of Montreal to be tested, we wanted to test its strength against handheld LED devices...

Our tests showed that Ruby Visage has 11,000 lux of power, compared to the LED devices which had only 10,000, 9,600, or 7,000 depending on the position of it.

That’s as much as 57% MORE POWERFUL!

Also, the LED devices were tested under “perfect” conditions. What we discovered is that with handheld LED devices, you have to keep the device PERFECTLY on your skin. Every time you move, even a tiny bit, you lose efficiency.

That means you need to move your hands in circles, perfectly, for 30 whole minutes, every single day, and you STILL don’t achieve the same results!

It just doesn’t make sense to use old, outdated technology when you can slip on the Ruby Visage mask and get the results you’re after in just 3 minutes per day.

Plus, it works anywhere, immediately. Just slip it on before work, during lunchtime, after work or while relaxing after dinner and painlessly rejuvenate your face.

If that wasn’t enough...
Here’s 6 More Reasons to Invest in Ruby Visage Today...

<table>
<thead>
<tr>
<th>Reason</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>The Best Value with Optimal Results</strong></td>
<td>You might get similar results with high-end spa laser treatments or plastic surgery... but you’ll pay up to 100x the price! Instead, invest in Ruby Visage once and you’ll be able to enjoy more youthful, glowing skin for a LIFETIME.</td>
</tr>
<tr>
<td><strong>Lasts A Lifetime</strong></td>
<td>Most LED light therapy devices on the market require either a power source or need to be charged on a regular basis. Like any electronic, they eventually break. Ruby Visage comes with a lifetime warranty because it’s virtually indestructible and still works even if you scratch it.</td>
</tr>
<tr>
<td><strong>Takes just 3 Minutes per Day</strong></td>
<td>In just 3 minutes per day you can experience the same results as you’d see using expensive red light therapy in clinics. We have customers using it before work, on a lunch break, after work, relaxing outside, or even sitting near a window any time the sun is shining!</td>
</tr>
<tr>
<td><strong>Start a Session Anywhere</strong></td>
<td>Ruby Visage is portable and doesn’t require a power source, so you can have a rejuvenating session any time you want. Plus, it works in just 3 minutes per day, so you’ll always have time to get the results!</td>
</tr>
<tr>
<td><strong>Treats Multiple Conditions at the Same Time</strong></td>
<td>Because it uses the healing power of red light, Ruby Visage can improve your skin in multiple ways all at once. It treats many conditions, including wrinkles, fine lines, acne scarring, dark circles, saggy skin, sun spots, redness, and so much more!</td>
</tr>
<tr>
<td><strong>Guaranteed to Work</strong></td>
<td>Or You Don’t Pay. Ruby Visage works for almost everyone who tries it. If for some reason you aren’t experiencing the results you’d expected, simply send it back within 60 days and we’ll give you a 100% refund. No questions asked!</td>
</tr>
</tbody>
</table>
But don’t take our word for it, look at these amazing metamorphoses our customers have experienced...

… Transformation in 15 Days

“Ruby Visage, what a great invention!!!! After 15 days, I found a real transformation of my face. 1- My skin is tighter 2- Wrinkles in my forehead are fading 3- Two wrinkles between my eyebrows have faded as if they have been filled 4- My face looks more rested 5- Dark spots are less visible. I continue this experience and I am determined to do it every day!”

Nicole Fromont, 65, St-Lazare, Canada

… I Was Dreading Wearing the Mask

“I admit I was septic when I saw this new product. An opportunity led me to try it for 10 days. The result is real and surprising. Even my husband who is not a follower of compliments saw the difference. The skin is more flexible, therefore the much less visible imperfections. The two dark spots that I had for years faded dramatically. I also dreaded the constraint of wearing that mask. In fact, it is relaxing and enjoyable. Me, who do not want to stay in place, I now give myself a good relaxing time in the day. I’m really glad I made the initial effort to try it and I recommend to all women and even men also try this experiment. I must add that the result is even more visible when I’m positioned facing the sun outside.”

Annie Gudenkauf, 70, St-Sauveur, Canada

… At First I Had Doubts About Its Effectiveness

Just like you I had doubts about the effectiveness of this technology and just like you I see its benefits after each session!!! I cannot wait to see what it will do for me at the end of the summer!!”

Magdalena Lafontaine, 40, Montreal, Canada
... I’m loving the New Radiance of My Skin

“I’ve been doing my Ruby Visage sessions for three weeks. I found there is an improvement in the radiance of my skin, the firming of my skin pores and the feeling of having a more hydrated skin.”

**Claudette Chapados, 45, St-Sauveur, Canada**

---

2 Minutes per Day for a More Youthful Appearance!

I wear the mask daily for 2 minutes and I’m really pleased with the results.

I find that my skin has a better grain and has a more youthful appearance in general.

I am very surprised and happy with my face that I find younger and brighter.

**Christelle Barbotin, Guadeloupe**

---

... Simple, Fast and Effective!

“Only good words for Ruby Visage! Here are the changes I noticed: age spots have faded and complexion is brighter! Really happy with the results so far. Here’s how I describe Ruby Visage: Simple, fast and efficient. And what about the relaxation that provides Ruby Visage!!!

Thanks again!”

**Chantal Forget, 45, Laurentides, Canada**

---

... Smoother Skin with Fewer Wrinkles

“Reduced wrinkles on my cheeks and my skin looks smoother and I have proof in pictures. I am delighted and I hope that improvements will continue to be seen over time. Thank you Ruby Visage.”

**Renée Gasser, Grolley, Switzerland**

---

www.RubyVisage.com
Try Ruby Visage Today, Risk-Free, For as Little as $87

Ruby Visage is hands-down the best dollar-for-dollar value on the market today.

Pay just ONCE and own it for life, with a lifetime warranty!

- No recurring laser treatments at $250+ EACH...
- No batteries, short cords or LED lights to replace...
- Very little time commitment required (just 3 minutes per session!)
- Great for busy people or those who love to travel...
- Works with and ENHANCES the results of your favorite anti-aging gel!

Simply purchase a Ruby Visage today and transform your unwanted wrinkles, fine lines, red spots and even acne scarring, into smooth, beautiful, youthful skin.

Now you can experience all the long-term residual healing benefits in the comfort of your own home, at your own convenience.

Click here to choose the option that works best for you.
